

FITTskills Edition 7.2 — Workshop Syllabus

Workshop: International Distribution: Transportation of Goods and Delivery of Services

Workshop Description:

As part of global supply chain management, distribution is a primary activity for all aspects of organizations. This workshop explores the aspects of distribution that are essential to international trade:

- Transportation requirements
- Border crossing requirements
- Service delivery

For the purposes of this workshop, distribution refers to the transportation of goods or delivery of services through established procedures that allow goods and services to cross borders. Organizations that provide raw materials or components and finished goods (contract manufacturers) are referred to as shippers. Organizations that deliver services are referred to as service providers; collectively they may be referred to as suppliers.

This workshop details the logistics tasks, risks and considerations when transporting goods and delivering services across borders.

This is the third of four workshops for the course *Global Value Chain*. Each workshop explores a global value chain activity in relation to international trade.

FITTskills Program:

The *International Distribution* workshop is a key workshop in Edition 7.2 of the FITTskills Program, which has been designed for the independent self-directed learner who is an international trade practitioner with a minimum of two to five years of experience. The FITTskills Program has been developed so that you as a practitioner can ensure you have all the competencies required to take advantage of international trade opportunities.

Pre-Requisites:

- It is recommended that you have the required learning from the *Feasibility of International Trade* course prior to beginning the *International Distribution* workshop. You can complete the course *Feasibility of International Trade* or self-assess your knowledge of its content by reviewing the learning outcomes for the course.

International Distribution – Workshop Syllabus

Assignments & Formative Assessments:

In addition to the sections in each unit to help you apply your learning and to extend your learning to various situations, there is a Final Check at the end of the module. This multiple-choice quiz for the workshop provides sample questions and answers for you to prepare for the summative exam. These questions have also been provided as an interactive quiz on the learning platform.

Summative/Final Assessment:

Once you are ready, you can write the workshop evaluation. This is a standardized open-book exam consisting of 15 multiple choice questions. Learners must complete this exam online within two hours. You can write your exam at any time as long as it is done before the deadline.
