

## FITTskills Edition 7.3 — Workshop Syllabus

### Workshop: Situational Analysis: Determining Current State and Opportunities for Growth

#### Workshop Description:

Determining organizational readiness and conducting market research are essential aspects of planning and conducting global business. However, these activities can be time-consuming and expensive. This workshop explains how to conduct a situational analysis, including assessing organizational readiness and planning and analyzing the results of international market research.

This is the first of three workshops for the course *Feasibility of International Trade*. Each workshop explores a phase of determining the feasibility of a potential initiative.

#### FITTskills Program:

The *Situational Analysis* workshop is a key workshop in Edition 7.3 of the FITTskills Program, which has been designed for the independent self-directed learner who is an international trade practitioner with a minimum of two to five years of experience. The FITTskills Program has been developed so that you as a practitioner can ensure you have all the competencies required to take advantage of international trade opportunities.

#### Pre-Requisites:

- There are no recommended workshops prior to the *Situational Analysis* workshop. The *Feasibility of International Trade* course, from which this workshop derives from, is the foundational course in the FITTskills Program.
- The *Situational Analysis* workshop assumes you have the necessary basic business and trade knowledge and skills needed for domestic trade, as these fundamentals are not covered in the FITTskills Program.

#### Workshop Learning Outcomes:

Upon successful completion of this workshop, you will be able to:

1. Assess the readiness of the organization to undertake the potential new international trade initiative or expansion.
2. Develop a research brief that outlines the parameters of the research to be undertaken based on identified research objectives for the prospective initiative.

3. Screen potential international markets to identify priority markets.
4. Design the research plan and conduct the designated research.
5. Analyze research data and present findings and recommendations as they relate to the stated research objectives.

### Schedule:

You can begin any time. Learners must complete the workshop within one month of registration.

### Workshop Format:

You have one month to work through the self-led workshop and complete the final assessment at your own pace. You'll receive your topic-specific textbook in eBook format. At the end of your learning, you can write the summative exam for the workshop.

Registration in this workshop provides you with access to additional learning resources, such as guiding notes, case studies, sample exam questions and the answers to the exercises in the textbook. These additional resources provide you with an opportunity to apply your learning and verify your progress. Although access to these resources are provided, the only requirement to complete the workshop is successfully passing the exam.

### Learning resources:

The workshop includes extensive content about the feasibility of international trade as an integral part of international trade. It also offers:

- An initial checklist for you to 'Reflect on Your Experience' to help you decide which sections you need to spend most time on, and where you may have previous learning
- Case examples that demonstrate innovative and good business practices, global examples and lessons from the field
- Many sample documents to illustrate requirements and good practice within the global value chain
- Sections that help you to consolidate and apply your learning at the end of each unit
- Opportunities for extended learning at the end of each unit to broaden the scope of your application, and to help you relate the learning to specific situations
- A list of 'Recommended Resources' for additional reading and learning on the topics

### Assignments & Formative Assessments:

In addition to the sections in each unit to help you apply your learning and to extend your learning to various situations, there is a Final Check at the end of the module. This multiple-choice quiz for the workshop provides sample questions and answers for you to prepare for the summative exam. These questions have also been provided as an interactive quiz on the learning platform.

### Summative/Final Assessment:

Once you are ready, you can write the workshop evaluation. This is a standardized open-book exam consisting of 15 multiple choice questions. Learners must complete this exam online within two hours. You can write your exam at any time as long as it is done before the deadline.

To access the examination:

1. Go to [www.FITTforTrade.com](http://www.FITTforTrade.com)
2. Under SIGN IN, enter your FITT ID and password
3. Click the **FITT Students** menu (left-vertical menu), then **Online Exam Centre** and then **Login now to begin your exam**—this will redirect you to the online exam center
